PROJECTS

1. FISS

FISS is an online trade booking application for various clients.It involves trade booking using shell script as well as UI.

2. ESS-Web Services (Rest API Testing)

ESS-Web Services exposes APIs to the Financial Based US clients where clients can call our API to register customers, modify customer details, view payment history, add payment method and make online payments.

3. eProspectus

eProspectus is a client facing iframe application used for placing the order for the funds by the customers. Application has total five clients. Each client has unique logo and each fund is uniquely identified by CUSIP and TICKER which involves CDSL Databases and webservices as backend services.
